

IDYN Object Manager Advanced

A Powerful Tool to Transform, Create, &
Upgrade Dynamics Nav to Business Central

MEET THE CHALLENGE OF CHANGE

The technology world is changing, and it's changing faster than the speed of light.

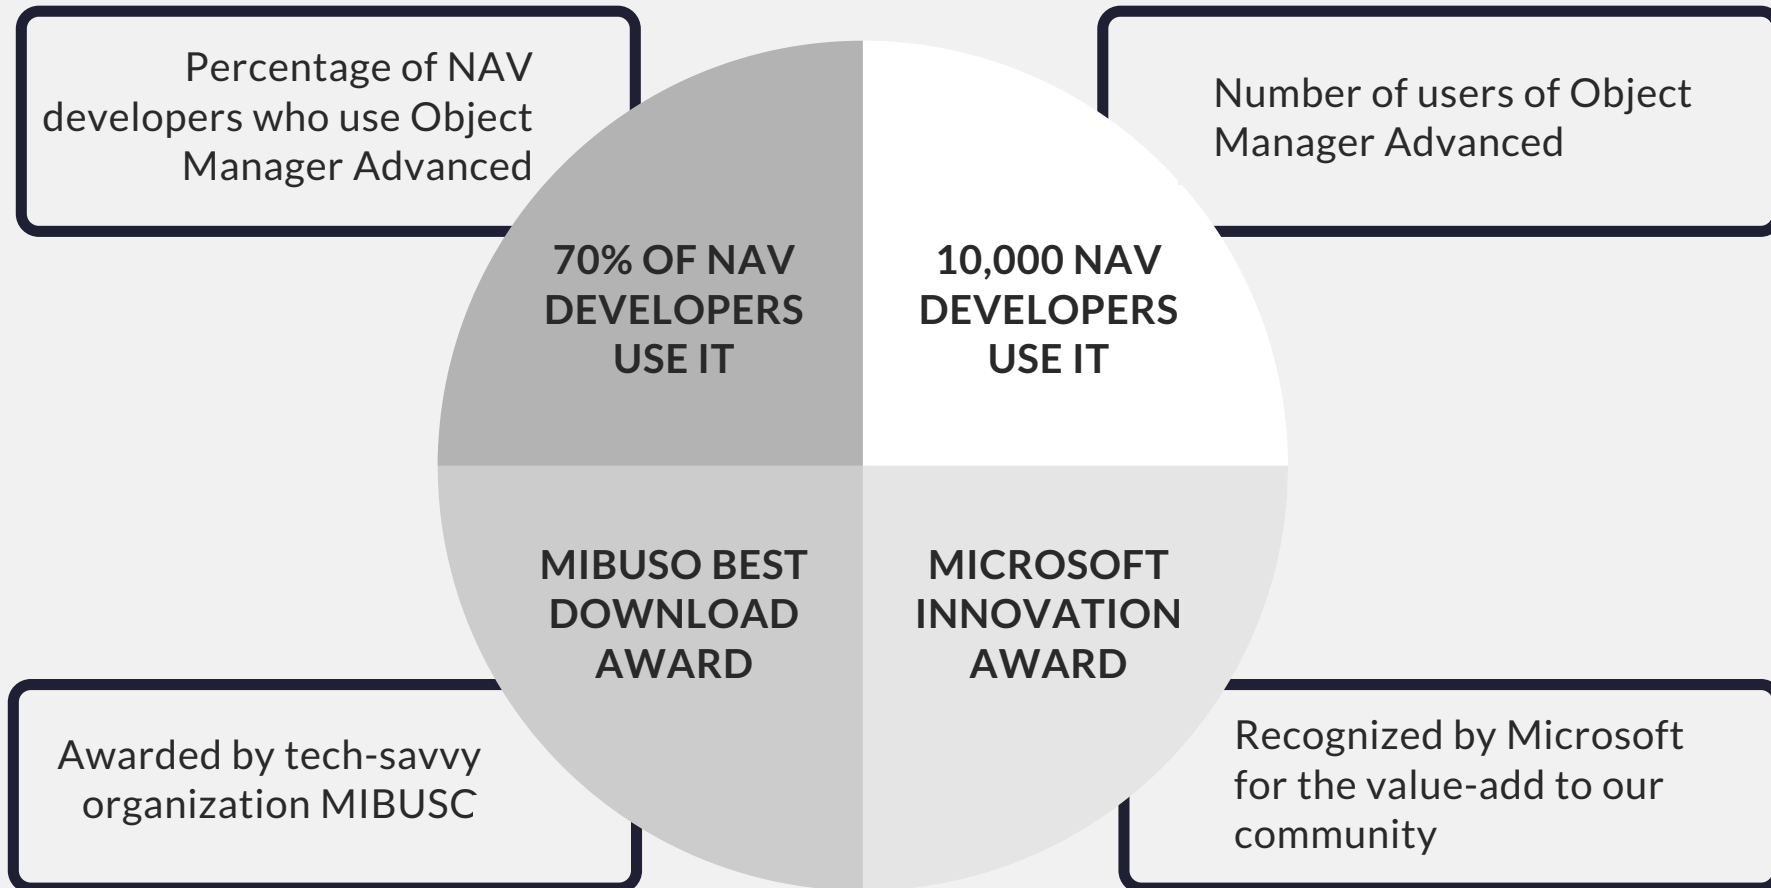

With the introduction of new development platforms for Microsoft ERP, it is clear that Microsoft Dynamics NAV and its shiny new replacement, Dynamics 365 Business Central, will not be left behind.

Developers know that without the right tool , it will be more costly and take extra time and effort to transition companies from C/AL to AL.

The right tool is IDYN Object Manager Advanced.

**USE THE RIGHT TOOL
TO TRANSITION FROM
DYNAMICS NAV TO
BUSINESS CENTRAL**

QIXAS RECOMMENDS IDYN OBJECT MANAGER ADVANCED AS THE TOOL OF CHOICE FOR NAV DEVELOPERS

MEET YOUR DEADLINES AND BUDGETS FOR NAV/BUSINESS CENTRAL PROJECTS WITH IDYN OBJECT MANAGER ADVANCED

- Use Object Manager Advanced to skip the mundane tasks and create more value for your customers.
- You don't have to charge scary big dollar proposals to help your customers move from Dynamics NAV to Business Central.
- Produce consistent quality outcomes with all your projects.

FULLY INTEGRATED IN
MICROSOFT DYNAMICS
NAV/BUSINESS CENTRAL

QIXAS CHOSE IDYN OBJECT MANAGER ADVANCED FOR ITS VERSATILITY AND EFFICIENCY

No worries, regardless of where the source code comes from, your development environment remains the same.

Use one powerful development tool to accomplish many tasks.

For example, use Object Manager Advanced to see and trace AL files within Visual Studio code.

Visibility that allows you to view all pending modifications and file history as well.

Why not develop, create or convert Microsoft Dynamics NAV to Business Central the easy way in record time?

USE A SHORTCUT TO CREATE APPS IN BUSINESS CENTRAL

Simply Export any C/AL object as an AL file.

Save Time - Eliminate Typing Errors.

You Don't Have to Remember to Save Your Work – It's Automatic!

USE ONE DEVELOPMENT TOOL FOR ALL VERSIONS OF NAV

IMAGINE THIS:

Your customer is running an older version of NAV on premise. You can develop a customization using the modern AL code, then convert it to C/AL so they can run it on their existing site.

Voila! You just did a backward conversion which opens up the possibilities for working with any version of NAV.

**WE THOUGHT
THIS THROUGH**

**USING OBJECT MANAGER
ADVANCED FOR ADD-ON CREATION
ENSURES COMPLIANCE WITH THE
REQUIREMENTS TO BECOME CERTIFIED
FOR MICROSOFT DYNAMICS (CFMD).**

WE'RE HERE TO MAKE CODING SO EASY YOU'LL FORGET ALL ABOUT THE BORING STUFF

Fully Integrated in Dynamics NAV/BC

IDYN OBJECT MANAGER ADVANCED WORKS WITH:

**Dynamics 365 Business
Central (Available H2)**

Dynamics NAV

MEET YOUR CUSTOMER'S REQUIREMENTS RAPIDLY

Object Manager Advanced puts an end to endless checking, testing and comparing before deployment.

You simply use the wizard to import combined modifications into your customer's database.

All from within Microsoft Dynamics NAV/BC, of course. So no hassle of switching from system to system.
