ShipIT

Integrate with 400+ carriers directly from within
Microsoft Dynamics NAV / Business Central

idyn
connecting worlds

Ship your orders directly from Microsoft Dynamics NAV/BC with easy access to 400+ carriers worldwide.

Now available on Microsoft AppSource

Minimize time spent on organizing shipments

ShipIT is the one stop shop to deal with preferred carriers worldwide. Created orders are translated to the requirements of the selected carrier which results in the automatic generation and posting of transport orders and printing of labels. Watch the shipping process unfold and gain back time.

NAV/BC sales orders or warehouse shipments are translated to the requirements of the selected carrier. This results in a transport order which can be used to automatically submit shipments and print all corresponding transport labels.

Communicating with your carriers with just one click saves vast amounts of time and minimizes the risk of errors.

Calculate time and cost savings through the ROI calculator on idyn.nl.

Real-time tracking

Want to check up on your shipment? The information is available real-time in Microsoft Dynamics NAV/BC. After e-mail notification set-up, the parcel receiver can follow their order via the provided real-time track & trace link.

Integrated carrier communication, via Transsmart

ShipIT is powered by Transsmart, a leading global logistics data provider with a focus on streamlining communications between carriers and ERP systems.

TRANSSMART
Makes you deliver!
